

Mold a Penguin!

Make 1 large black egg and 4 medium eggs (2 black, 1 white, orange)

Make a flat oval from the large black egg. Roll out and flatten some of the white to make a belly to lay on top.

Form arms (both from 1 medium egg) and feet to attach to the body. **TIP:** press your nails into the feet to make toes.

Slightly flatten the remaining black egg to make a head.

Make eyes and a beak. Then let your penguin waddle around!

Mold a Monster!

Get white model magic, set some aside for eyes.
Use markers to color the rest a spooky color!

Mold a body shaped like candy corn. Then, make arms and legs; you pick how many your creature has!

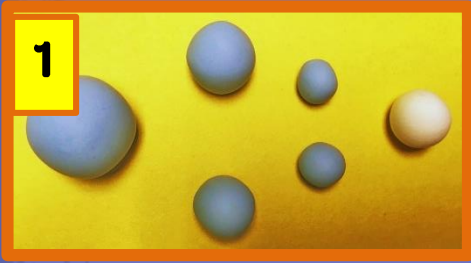

Attach eyes, arms and legs to the body. Use the spatula tool to make a mouth.

**Add any
features
you want!**

Mold a Mythical Dragon!

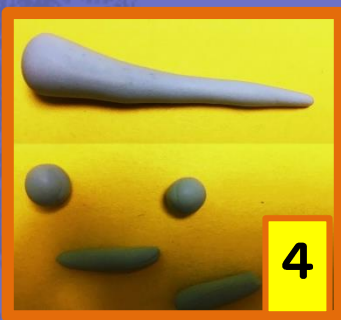

Get white model magic, set some aside. Use the markers to color the rest. Divide into: 1 large egg, 2 medium eggs and 2 small eggs.

HEAD: Mold a medium egg into a rounded triangle shape.

BODY: Roll the large egg into a cone shape, it looks better if you make it uneven.

Divide a small egg into two small balls (FEET) and 2 rolls (ARMS). Roll the other medium egg into a TAIL.

Stack everything together. Use your remaining model magic to make other features (eyes, spikes, ears, etc.)

Create a Starfish!

1

2

STEP 1: Split your model magic into 1 big ball & 4 little balls. Color big ball with marker to make it a different color.

3

STEP 2: Take big ball & split into 5 worms.

STEP 3: Smoosh worms flat & attach them at the ends to form a star shape.

4

5

STEP 4: Take two little balls and attach them as eyes.

STEP 5: Then take another little ball & roll into worm, then attach ends to form circle. Add it as the mouth.

6

STEP 6: Roll last little ball into worm and then use dough tool to chop into little pieces. Then attach them all around body to make texture and you are done!

You did fishtastic!

Mold a Shark Tooth!

Split 1 white model magic packet in 2 halves. Color one with yellow, brown & orange and smoosh to mix. Color the other with brown & black, smoosh to mix.

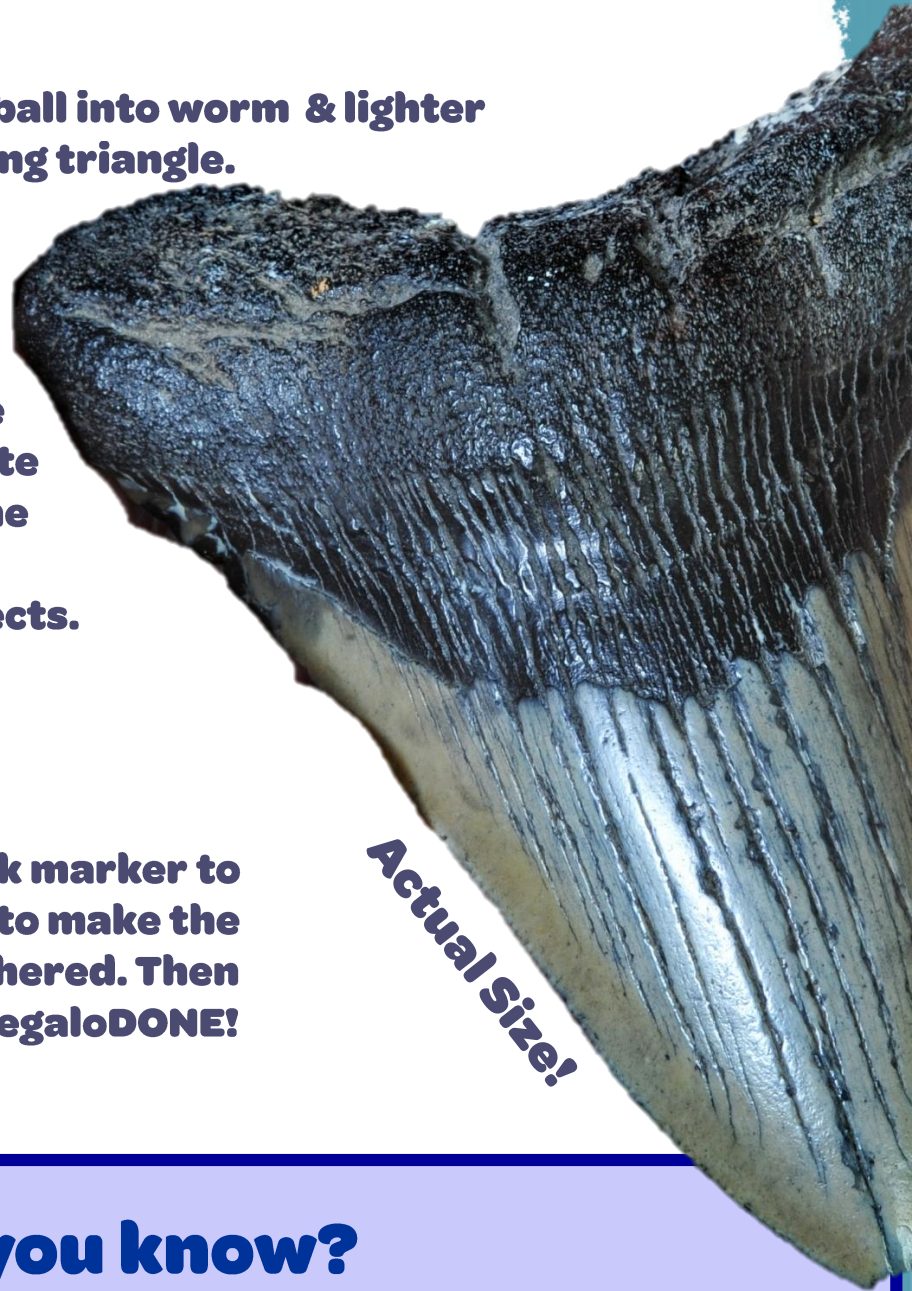

Roll darker ball into worm & lighter ball into a long triangle.

Connect the 2 pieces. Use tools to create grooves in the tooth for realistic effects.

Use brown & black marker to create lines & marks to make the "fossil" look weathered. Then you are MegaloDONE!

Actual Size!

Did you know?

A Megalodon is the biggest shark to ever live! It weighed about 50 tons which is equal to 9 million Crayola crayons! It grew up to 60ft long, which is equal to 4 car lengths! Its teeth could grow to be over 7 inches long and the largest Megalodon tooth ever found was in the South Carolina!

Mold a Trophy!

Divide a packet of model magic into 3 eggs: 1 large, 2 small.

Pinch the large egg around your finger to form a cup.

Roll 1 small egg into 2 worms; use them to make handles.

Use the remaining model magic to build the base of your trophy. Then you can decorate it with markers!
