

CREATE A REFRIGERATOR

YOU WILL NEED:

1 Lg Cardboard Box · Cardboard Scraps · Markers · Glue · Scissors · Printable Fridge Templates

1

cut

cut

Cut off top and bottom flaps of cardboard box so that remaining 2 flaps create fridge doors.

2

Now create shelves. Find cardboard scraps that are longer than the box's width. Then, cut slits in the sides & slip the cardboard "shelf" through each side. Now, take the extra cardboard hanging on the outside and tape it down, scoring the cardboard to help it bend.

3

Create a drawer by cutting off a box bottom OR taking a cardboard can holder and adding one of your cut off flaps to the front. Get creative with what you have!

4

OPTIONAL: Use old wrapping paper to cover your fridge and give it polish! Or just freestyle with markers!

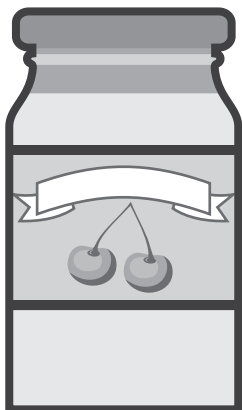

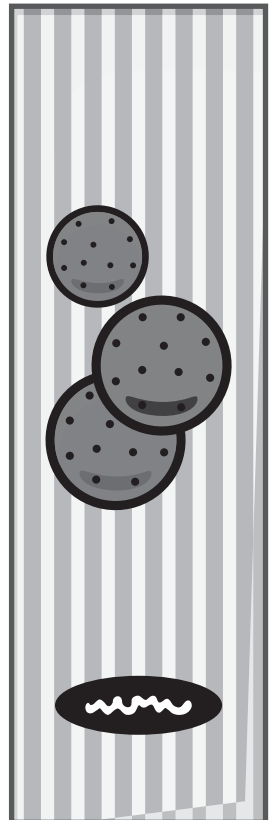

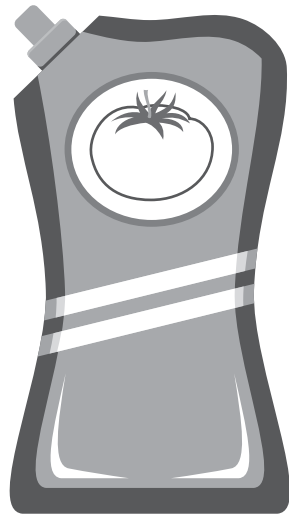

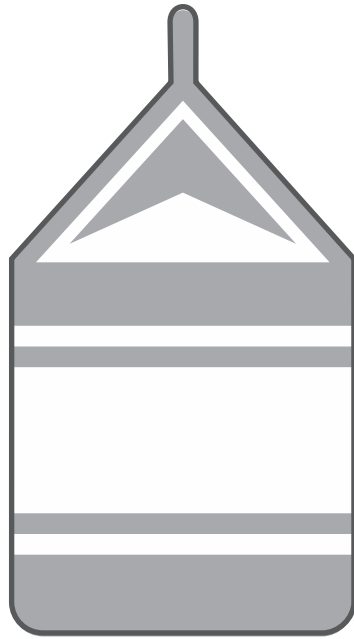

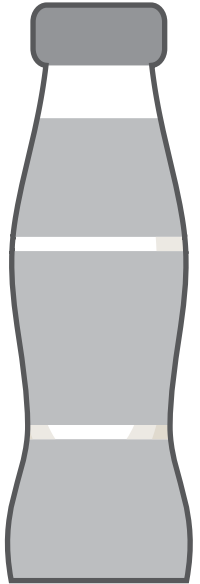

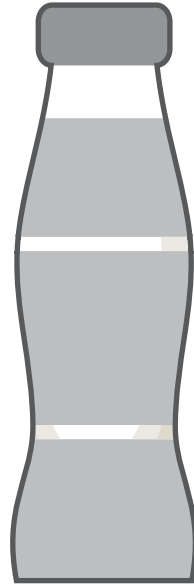

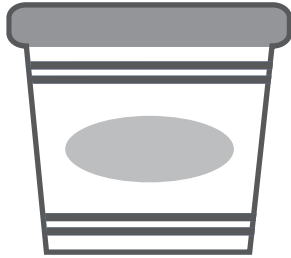

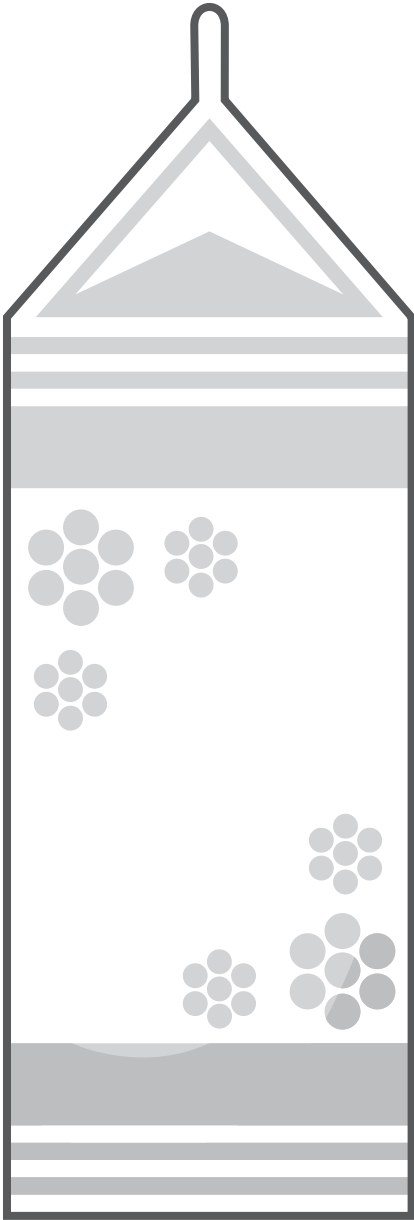

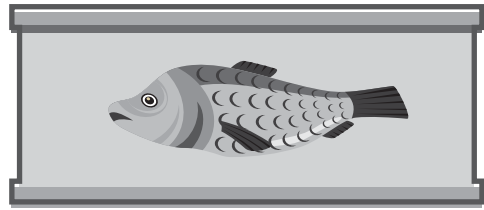

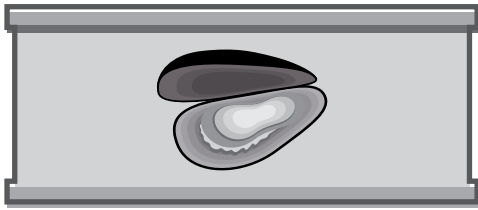

5

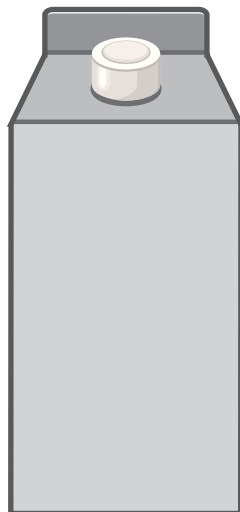

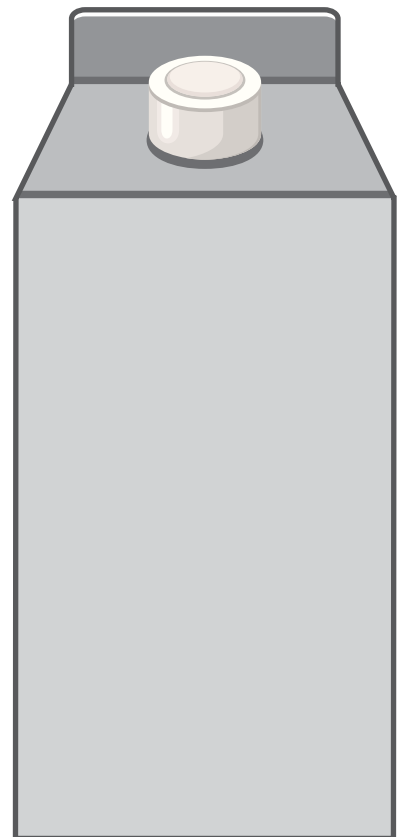

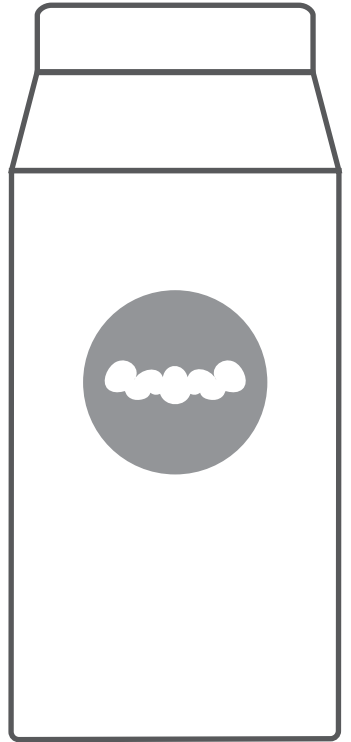

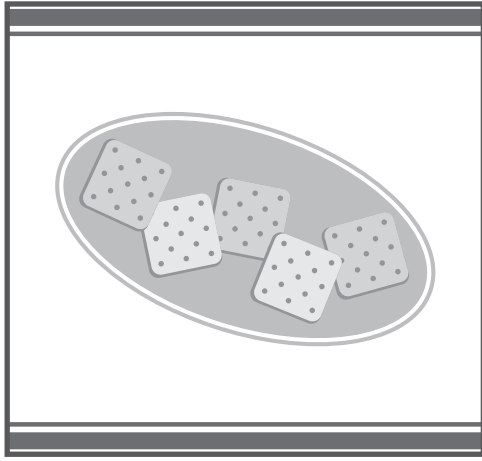

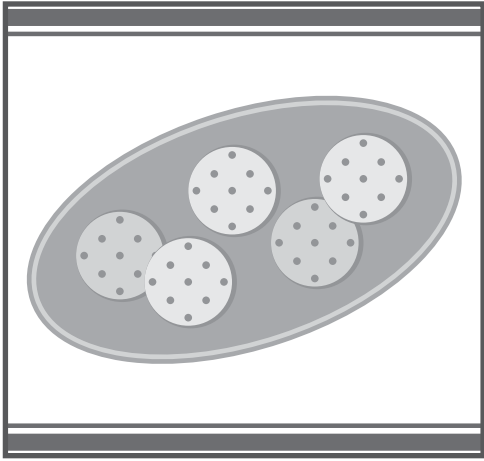

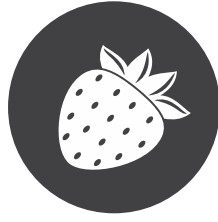

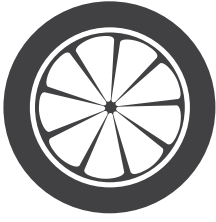

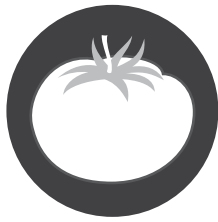

Color fridge food & accessories. Glue them into & onto the fridge!

Have fun playing with your new "COOL" fridge!
