

MODEL MAGIC FLUTE

1

Use 2 different colors of Model Magic. One for the flute, and one for the buttons. **TIP:** You can use markers to color white Model Magic.

2

Take a pinch of the flute color, roll it into a ball, then smooch it. Take the rest and roll it into a long worm shape.

3

Pinch a piece off the button color, roll into a ball, then smooch it. Section the remaining Model Magic into 6 small pieces. Roll 5 into balls and the 6th piece into a worm. Curve it a bit.

4

Take your 5 Model Magic balls and evenly space them on a little more than half the length of the flute. Put the pinch of flute color over top of the pinch of button to create the mouthpiece.
